

PBA: Laparoscopic cholecystectomy		
Trainee:	Assessor:	Date:
Start time:	End time:	Duration:
Operation more difficult than usual? Yes/No (If yes, state reason)		

Score N=Not observed / not appropriate U = unsatisfactory S = Satisfactory

	Competencies and definitions	Score N/U/S	Comments
I. Consents			
C1	Demonstrates sound knowledge of indication of surgery		
C2	Demonstrates awareness of sequelae of the operation		
C3	Demonstrates sound knowledge of complications of surgery		
C4	Explains the perioperative process to the patient and/or relatives		
C5	Explains likely outcome and time to recovery		
II. Pre-operative planning			
PL1	Demonstrates the understanding of basic anatomical abnormalities of the patient		
PL2	Demonstrates ability to make reasoned choice of appropriate equipment, material or device		
PL3	Check materials, equipment, and device requirement with operating room staff		
PL4	Checks patient records, personally reviews preoperative investigation		
III. Pre-operative preparation			
PR1	Checks in theater that consent has been obtained		
PR2	Gives effective briefing to theater team		
PR3	Ensures proper and safe position of the patient on the operating table		
PR4	Demonstrates careful skin preparation		
PR5	Demonstrates careful draping of the patient's operative field		
PR6	Ensures general equipment and materials are deployed safely		
PR7	Ensure appropriate drug administration		
IV. Exposure and closure			
E1	Demonstrates knowledge of port position		
E2	Achieves an adequate exposure by create adequate pneumoperitoneum		
E3	Complete a wound closure properly		

V. Intraoperative technique			
IT1	Follows an agreed, logical sequence of the procedure		
IT2	Consistently handle tissue well with minimal damage		
IT3	Uses instruments appropriately and safely		
IT4	Proceeds at appropriate pace with economy of movement		
IT5	Anticipates and responds appropriately to variation of anatomy		
IT6	Deal calmly and effectively with untoward events		
IT7	Uses assistants to the best advantages at all times		
IT8	Communicates clearly and consistently with scrub team and anesthetist		
IT10	Demonstrates the familiarity with anatomical structures of gall bladder and its relations		
IT11	Demonstrates proper techniques of identify and dissect Carot's triangle		
IT12	Achieves an adequate hemostasis		
IT13	Demonstrates proper techniques of gall bladder removal		
VI. Post operative management			
PM1	Ensure the patient is transferred safely from the operating table to bed		
PM2	Constructs a clear operative note		
PM3	Records clear and appropriate postoperative instructions		

Global Summary		
Level at which completed elements of the PBA were performed	Check as appropriate	Comments
0 Insufficient evidence observed to support a judgement		
1 Unable to perform the procedure under supervision		
2 Able to perform the procedure under supervision		
3 Able to perform the procedure with minimum supervision		
4 Competent to perform the procedure under supervised (could deal with complications)
